

Dear Allergist:

Your patient is working at Temple University. We here at Employee Health Services will be happy to continue their immunotherapy while they are employed by Temple.

In order to provide the best care for your patient, we will need the following information from your office:

- Immunotherapy vaccine administration schedule
- “Missed shots” schedule
- Guidelines for dose reduction and treatment after a local reaction
- Guidelines for dose reduction and treatment after a systemic reaction
- Indications for when to hold the shot (*e.g.*, fever, *etc.*)

When your patient starts a new vial of serum, they will need to have their first shot in your office.

Please have your patient hand-carry their vial of allergy serum to our office. **We will not accept any shipped vials, as they do not always arrive refrigerated.**

Thank you for your assistance.
